TITLE: Non settling hair and scalp conditioner contg. sulphur - contains hectorite clay modified with e.g. propylene carbonate and organic liq. to prevent phase sepn.

Basic Abstract Text:

An anhydrous medicated scalp and hair conditioner contains 50-94 wt% petrolatum, 0.5-5 wt% mineral wax, at least 0.5 wt% polyoxyethylene (8) dilaurate (I), about 0.15-2.25 wt% S, and 1-30 wt% of a modified hectorite gellant, hectorite is modified with propylene carbonate, stearalkonium chloride or dimethyldi(hydrogenated tallow)ammonium chloride, and an organic liq selected from mineral oil, castor oil, isopropyl myristate, isopropyl palmitate, a mixt of lanolin and isopropyl palmitate, or a mixt of propylene glycol dicaprylate and propylene glycol dicaprate.

BASIC-ABSTRACT:

Preventive for dandruff contains abietic acid as the effective ingredient. Abietic acid is obtd. by extracting natural resins such as rosin, dammar, balsam, copal, accroid, amber, etc.

Abietic acid prevents the formation of dandruff, and the itchy feeling caused from dandruff, and can be combined in hair cosmetics such as shampoo, hair tonic, hair cream, hair rinse, hair oil, pomade, etc. The hair cosmetics obtd. can be preserved for long time.

In example, a hair tonic contains alcohol 84.3% glycerin 5%, abietic acid 0.1%, perfume 0.2% and castor oil 10%, and a hair cream contains liq. paraffin 45%, sorbitan stearate 2.1%, polyoxyethylene-sorbitan stearate 2.2%, BHA 0.05%, antiseptic 0.15% perfume 0.3% abietic acid 0.2% and water.

TITLE: New hair growth stimulating compsn. - with reduced allergenicity based on natural prods.

Basic Abstract Text:

Compsn. for stimulation of hair growth comprises: (i) 10-90 wt. % non-cyclic organic sulphur cpd. in aq. soln.; or (ii) 15-20 wt. % onion juice, 3-5 wt. % allicin and diallyl sulphides in aq. soln.; 3-5 wt. % honey; 3-5 wt. % petroleum jelly; 3-5 wt. % sesame oil; 9-13 wt. % egg yolk; 9-13 wt. % castor oil; 7-10 wt. % herbal extract; and 30-40 wt. % mineral oil. Also claimed are processes for mfg. a hair growth formula comprising: (i) mixing onion juice, garlic, petroleum jelly, sesame oil, castor oil, mineral oil, herbal extract, honey and egg yolk; pouring through a juicer; and homogenising; or (ii) mixing equal parts of the above ingredients, pouring through a juicer; homogenising, further mixing of more onion juice, egg yolk, castor oil, mineral oil and herbal extract, and further homogenising .

Basic Abstract Text:

USE - The compsn. is used as a hair conditioner. It is used to promote growth of new hair cells while also stimulating growth of existing hair cells to make the hair longer and thicker.

ABSTRACT:

An oily hair growth compsn. contains 1-30 ml of plant-based juniper oil, 2-30 ml of valerian oil, 6-20 ml of paraffin-based birch oil, 6-20 ml of plant-based St. John's wort oil, 6-20 ml of paraffin-based burdock root oil, 6-20 ml of paraffin-based rose hair oil, 2-30 ml of plant-based arnica oil comprising 90% of olive oil, 0.1-2.5g of peppermint leaves, 0.2-3 pieces of sweet peeled almond, 0.1-2.5g of nettle leaves, 15-170 radish seeds, 20-180 kohlrabi seeds, 15-170 fenugreek seeds, 15-170 yellow mustard seeds, and 2-30 1 cc pieces of red apple or 2-30 ml of apple oil. The compsn. also contains 1-30 ml of plant-based grapeseed oil, 1-70 ml of plant-based orange flower water, 1-18 ml of paraffin-based honeydew melon oil, 1-56 ml of plant-based coconut oil, 1-80 ml of paraffin-based linseed uridol oil, 1-80 ml of paraffin- or plant-based kiwi oil, 1-80 ml of plant- or paraffin-based coriander oil, 1-30 ml of paraffin- or plant-based peach oil, 1-30 ml of plant-based balm oil, 1-70 ml of plant- of paraffin-based pomegranate oil, 1-30 ml of plant-based sandlewood/sandelwood bark oil, and 1-50 ml of plant-based jojoba oil. ADVANTAGE - All the components can be stored together in one container (claimed). The effectiveness of the compsn. is greater, w.r.t. the compsn. of the parent patent

TITLE: Lipid compounds derived from sphingosines, process for preparing these and their applications, in particular in cosmetics and in the pharmacy of skin conditions

Brief Summary Paragraph Right (37):

When the compositions of the invention are presented in the form of oily, oleoalcoholic or aqueous-alcoholic lotions, they can constitute, for example, antisen lotions containing a screening agent absorbing UV rays or demulcent lotions for the skin or hair; the oily lotions can, in addition, constitute foaming oils containing an oil-soluble surfactant, bath oils, and the like.

Detailed Description Paragraph Table (8):

Compound of Example 1 5 g Glyceryl stearate 2 g
TWEEN 60 1 g Stearic acid 1.4 g Triethanolamine 0.7 g CARBOPOL 940 (neutralized with
0.2 g triethanolamine Sweet almond oil 3 g Liquid paraffin 8 g Antioxidant 0.05 g
Preservative 0.3 g Water qs 100 g
